

Rui Dias (Aveiro - Portugal) is the name behind 0v3rd0s3d project. Born in 1988, soon he discovered music was the passion of his life... Influenced by his brother he started listening to metal and started playing drums since very young age. Back in 2004 after listening to electronic music as well (psychedelic/dnb) and watching a friend having fun in fruity loops, he decided he could make his own noises too. In that year - 2004 - and after "studying" music, he started to compose based on his daily actions and his musical background. Since middle of 2005 till now he has been developing new skills and improving his quality. His sounds can be described as night-time psychedelic music, with fast basses and synths, strong beats and some groovy danceable elements.

Fright Rate is the dark psychedelic trance project of Seth Human which was created in the beginning of 2006. Seth began his psychedelic journey in 2000 where he attended underground events in Cape Town, South Africa. In 2003 he started djing at most of the top organised events in South Africa such as Trancegression, Alien Safari and Lunar Tech playing alongside artists such as N3xu5, Psychotic Micro, Frozen Ghost, Void, Eskimo, Skazi.....

Seth later started experimenting with making his own tracks, concentrating on minimal and tech trance. Towards the end of 2005 he started becoming attracted to the more darker, faster and twisted side of trance, this is when his new vision was born. His style as he describes it is "spooky, fucked up shit for the darkest hours" with influences with influences from artists such as Claw, Paranoize, Horror place, Kemic-al, Highko and Savage Scream to name a few.

Abnormal Killers is the brainchild of Darko Janevski and Andrej Tasevski (Hagenith), born in a local hospital somewhere in Macedonia, in early 1990 and mid-1989, respectively. As a young kid, Andrej wanted to be Mozart and started doing some serious head-banging on the piano at the retarded age of 7. Unfortunately, he never got to be Mozart. As for Darko, he wanted to play soccer, but broke his arm doing god knows what and quit. In early 2002, they discovered Psytrance. They started producing in late 2004 and, on a pretty regularly boring night, Darko dreams about the name Abnormal Killers. They would never be the same again, for they've followed Darko's prophetic dream and started doing noise in 2005. It didn't work out so great initially, as the sound consisted basically of Andrej headbanging on Darko's broken arm (yeah, these things take years to recover, sometimes).

Noized is Lutz Oettershagen from Germany. After lots of parties he started to produce the music that his twisted mind was looking for. He experimented with different styles till he developed his own style of dark, disturbing, fast and hypnotising power psytrance. The tracks of his first album tell stories about the madness of life.

This solo project was born in the beginning of the year 2001 with the help of the Colombian Psy-Trance Family Culture. The style of this project is about to get mixed some most of the dark elements on a 70% with a 30% of Morning and Full on Together, for giving some pumping groove to the audience, without getting so cheesy on the movements. We just want you to put your brain on work and meditate about human reality on future.

!!DARK AND LIGHT: IS ALL RELATIVE!!

Paulo Rosa, 17 years old, Aveiro (Portugal). Divine Stones is a production project of electronic music that had his birth in 2004, while I learned and gained more and more knowledge about electronic music. My main influences are Inner Action, Spectra, Save The Robot, etc. For now this is a project where I try to improve from track to track and I try to approach more to my own style of psychedelic trance.

Odd Sequence aka (Chris Odd) Chris Kleitsas was born in Greece/Corinth in 1977. His first steps with music were through the metal scene, actually the death/thrash metal scene in 1990. He has studied piano for more over 7 years. The summer of 94 decided to get out of the metal scene and to move into more electronic vibes with the help of some groups of that time like NRO, Prodigy and all the breakbeat scene. This trip continues with the early trance music of 1995 and the first psychedelic trance artists like Total Eclipse, Masaray, Etnica and also with the first sounds of John Phantasm. That was it. He became really fan of this style of electronic music although he has entered also into the Ambient/Chill Out music and generally lots of styles of electronic music. He started djing in local bars in Corinth and Kiato. The summer of 1996 took place the first psychedelic trance party in Kiato which is his hometown. After some years of parties around this area he has the interest to make his first steps in composing. The piano studies and many influences he had, helped him enough to understand the principals of composing.

Paulo Alexandre, born in Portugal 1977, is the name behind 'palex' project. He was a resident dj in a local small club, when he was introduced to Psychedelic music by some friends who liked that style and started to organize parties there. He fell in love with psychedelic till an year passed and he starts producing and building his home studio. His influences come from different electronic music genres, and a special love for horror movies. Palex is working psychedelic fast, dark with groovy night sounds. Watch out for the brainwashing trips from palex...
